Subject Index of Volume 218

Adsorbtion
  continuous-wave laser photodeposition of amorphous selenium films, 201
Aluminium nitride
  photochemical growth of GaN and AlN on sapphire (0001) and GaAs (100), 75
Amorphous materials
  ArF excimer laser chemical vapor deposition a-Si:H/a-Al_xO_{1-x} superlattices, 62
  chemical vapour deposition of amorphous hydrogenated silicon with a CO_2 laser: chemical mechanism, 29
  continuous-wave laser photodeposition of amorphous selenium films, 201
  laser irradiation of amorphous thin films, 209

Cadmium
  photodeposition of thin cadmium films from CdS colloid solutions, 193
Cadmium sulphide
  continuous wave Nd:YAG laser deposition of CdS thin films, 157
  photodeposition of thin cadmium films from CdS colloid solutions, 193
Chemical vapour deposition
  ArF excimer laser chemical vapor deposition a-Si:H/a-Al_xO_{1-x} superlattices, 62
  chemical vapour deposition of amorphous hydrogenated silicon with a CO_2, laser: chemical mechanism 29
  deposition of optical coatings by laser-assisted evaporation and by photo-assisted chemical vapor deposition, 161
  kinetics in thermal laser-assisted chemical vapour deposition of titanium carbide, 8
  laser-induced chemical vapor deposition of metals for microelectronics technology, 80
  laser-induced deposition of tungsten from tungsten hexachloride, 122
  mechanisms of low temperature epitaxial silicon growth using ArF excimer laser photochemical vapor deposition from disilane, 48
  photo-excited processes related to semiconductor technology, 144
  photo-induced chemical vapour deposition of silicon oxide thin films, 170
  photochemical growth of GaN and AlN on sapphire (0001) and GaAs (100), 75
Clusters
  laser-assisted cluster deposition from the liquid phase, 187
Copper
  particulates in laser-deposited copper oxide films, 182
  study of gas-stream-assisted laser ablation of copper, 274

Deposition process
  continuous wave Nd:YAG laser deposition of CdS thin films 157
  continuous-wave laser photodeposition of amorphous selenium films, 201
  formation of atomic beams and dynamics of *in situ* superconducting film growth by pulse-laser deposition, 277
  formation of silver metal films by photolysis of silver salts of high molecular weight carboxylic acids, 109
  laser-assisted cluster deposition from the liquid phase, 187
  laser-induced chemical vapor deposition of metals for microelectronics technology, 80
  modification of surfaces with new eximer UV sources, 231
  narrow-gap IV–VI thin films produced by quasi-continuous-wave CO_2-laser-induced evaporation, 151
  photo-induced chemical vapour deposition of silicon oxide thin films, 170
  photodeposition of thin cadmium films from CdS colloid solutions, 193
  pulsed laser deposition of oxide superconducting thin films, 310
  temporal evolution in the UV-laser-induced deposition from $Mo(CO)_6$, 68
  influence of heterogeneous and homogeneous reactions in laser-chemical processing, 1

Electrical properties and measurements
  narrow gap IV–VI thin films produced by quasi-continuous-wave CO_2-laser-induced evaporation, 151
Electron spin resonance
  narrow gap IV–VI thin films produced by quasi-continuous-wave CO_2-laser-induced evaporation, 151
Epitaxy
  mechanisms of low temperature epitaxial silicon growth using ArF excimer laser photochemical vapor deposition from disilane, 48
  photo-excited processes related to semiconductor technology, 144
Etching
  pattern formation techniques in photochemical etching, 252
  photo-excited processes related to semiconductor technology, 144

Gallium arsenide
  laser direct writing of tungsten from WF_6, 137
Growth mechanism
  formation of silver metal films by photolysis of silver salts of high molecular weight carboxylic acids, 109
  laser irradiation of amorphous thin films, 209
  photo-excited processes related to semiconductor technology, 144

Heat treatment
  laser irradiation of amorphous thin films, 209

Indium
  photodissociation of trimethylindium on Si(111) at 193 nm, 58

Laser ablation
  basic elements for photodeposition high T_c thin film devices, 304
  deposition of optical coatings by laser-assisted evaporation and by photo-assisted chemical vapor deposition, 161
  particulates in laser-deposited copper oxide films, 182
  Study of gas-stream-assisted laser ablation of copper, 274
Laser irradiation
  ArF excimer laser chemical vapor deposition a-Si:H/a-Al_xO_{1-x} superlattices, 62
  chemical vapour deposition of amorphous hydrogenated silicon with a CO_2 laser: chemical mechanism, 29

continuous wave Nd:YAG laser deposition of CdS thin films, 157
continuous-wave laser photodeposition of amorphous selenium films, 201
formation of atomic beams and dynamics of *in situ* superconducting film growth by pulsed-laser deposition, 277
laser direct writing of tungsten from WF_6, 137
laser irradiation of amorphous thin films, 209
laser synthesis of thin films of metal silicides, 95
laser-assisted cluster deposition from the liquid phase, 187
laser-induced chemical vapor deposition of metals for microelectronics technology, 80
laser-induced deposition of tungsten from tungsten hexachloride, 122
mechanisms of low temperature epitaxial silicon growth using ArF excimer laser photochemical vapor deposition from disilane, 48
narrow gap IV–VI thin films produced by quasi-continuous-wave CO_2-laser-induced evaporation, 151
pattern formation techniques in photochemical etching, 252
photo-excited processes related to semiconductor technology, 144
photo-induced chemical vapour deposition of silicon oxide thin films, 170
photodeposition of thin cadmium films from CdS colloid solutions, 193
photodeposition sputtering of titanium and TiN thin films, 247
photodissociation of trimethylindium on Si(111) at 193 nm, 58
pulsed laser deposition of oxide superconducting thin films, 310
synthesis of thin films of semiconductor and refractory metal nitrides by laser irradiation of solid samples in ambient gases, 219
temporal evolution in the UV-laser-induced deposition from $Mo(CO)_6$, 68
influence of heterogeneous and homogeneous reactions in laser–chemical processing, 1

Metallization
laser-induced deposition of tungsten from tungsten hexachloride, 122
modification of surfaces with new eximer UV sources, 231
Metals
laser synthesis of thin films of metal silicides, 95
laser-induced chemical vapor deposition of metals for microelectronics technology, 80
synthesis of thin films of semiconductor and refractory metal nitrides by laser irradiation of solid samples in ambient gases, 219
Molecular beam epitaxy
irradiation effects of synchrotron radiation on silicon epitaxial growth using a disilane molecular beam system, 40
Multilayers
ArF excimer laser chemical vapor deposition a-Si:H/a-Al_xO_{1-x} superlattices, 62
basic elements for photodeposited high T_c thin film devices, 304

Nitrides
synthesis of thin films of semiconductor and refractory metal nitrides by laser irradiation of solid samples in ambient gases, 219
Nucleation
formation of atomic beams and dynamics of *in situ* superconducting film growth by pulsed-laser deposition, 277
photo-excited processes related to semiconductor technology, 144

Optical coatings
deposition of optical coatings by laser-assisted evaporation and by photo-assisted chemical vapor deposition, 161
Organometallic vapour deposition
photochemical growth of GaN and AlN on sapphire (0001) and GaAs (100), 75
temporal evolution in the UV-laser-induced deposition from $Mo(CO)_6$, 68
Oxides
particulates in laser-deposited coper oxide films, 182

Palladium
modification of surfaces with new eximer UV sources, 231
Polymers
formation of silver metal films by photolysis of silver salts of high molecular weight carboxylic acids, 109
modification of surfaces with new eximer UV sources, 231

Reaction kinetics
irradiation effects of synchrotron radiation on silicon epitaxial growth using a disilane molecular beam system, 40
kinetics in thermal laser-assisted chemical vapour deposition of titanium carbide, 8
influence of heterogeneous and homogeneous reactions in laser–chemical processing, 1
Resistivity
formation of atomic beams and dynamics of *in situ* superconducting film growth by pulsed-laser deposition, 277
Rutherford backscattering spectroscopy
silver photodissolution in amorphous chalcogenide thin films, 259

Semiconductors
synthesis of thin films of semiconductor and refractory metal nitrides by laser irradiation of solid samples in ambient gases, 219
Sensors
basic elements for photodeposited high T_c thin film devices, 304
Silicides
laser synthesis of thin films of metal silicides, 95
Silicon
chemical vapour deposition of amorphous hydrogenated silicon with a CO_2 laser: chemical mechanism, 29
irradiation effects of synchrotron radiation on silicon epitaxial growth using a disilane molecular beam system, 40
mechanisms of low temperature epitaxial silicon growth using ArF excimer laser photochemical vapor deposition from disilane, 48
photodissociation of trimethylindium on Si(111) at 193 nm, 58
Silicon oxide
irradiation effects of synchrotron radiation on silicon epitaxial growth using a disilane molecular beam system, 40
laser direct writing of tungsten from WF_6, 137
photo-induced chemical vapour deposition of silicon oxide thin films, 170

Silver
formation of silver metal films by photolysis of silver salts of high molecular weight carboxylic acids, 109
silver photodissolution in amorphous chalcogenide thin films, 259
Sputtering
photodeposition sputtering of titanium and TiN thin films, 247
Superconductivity
formation of atomic beams and dynamics of *in situ* superconducting film growth by pulsed-laser deposition. 277
monitoring of photodeposited superconductive films, 291
pulsed laser deposition of oxide superconducting thin films, 310
Surface composition
temporal evolution in the UV-laser-induced deposition from $Mo(CO)_6$, 68
Titanium
photodeposition sputtering of titanium and TiN thin films, 247
Titanium carbide
kinetics in thermal laser-assisted chemical vapour deposition of titanium carbide, 8
Titanium nitride
laser direct writting of tungsten from WF_6, 137
photodeposition sputtering of titanium and TiN thin films, 247
Tungsten
laser-induced deposition of tungsten from tungsten hexachloride, 122

X-ray photoelectron spectroscopy
photodissociation of trimethylindium on Si(111) at 193 nm, 58
